

The Home page of the Hyper Queue Application:

## Mate1 Programming Test

Please Enter User Name

Are you a Producer ? [Click here](#)

Are you a Consumer ? [Click here](#)

Enter the User Name of the User (It is mandatory to add the User name everytime)

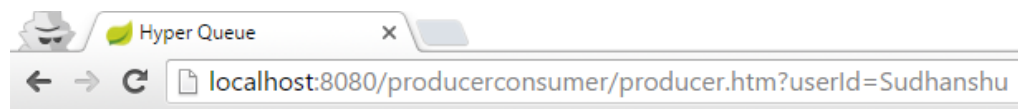

Click on “Click here” hyper link depending on the user is a **Producer or Consumer**.

N number of users can access this hyper queue. While testing on a local host I have tested by incognito window of the browser, different browsers at the same time. Request sent from Different Browsers is regarded as the request from different users as different session Id is created by the application.

# Producer:

1. Enter the Name of the topic and Events

Note: It is mandatory to enter the Topic name
